HISTORY AND PASSION

Artinox was founded in 1985 by Mario Zanardo in Conegliano in one of the most important Italian industrial areas known for the stainless steel processing. Dedicated to the high-end kitchen market, all our collections are designed and produced with passion in our factory and distributed all over the world.

QUALITY AND SUSTAINABILITY

Beyond the intrinsic qualities of the raw material, we are committed to the implementation of our environmental management system. At Artinox we have been using the control of all processes to guarantee the maximum result of the services offered - ISO 9001 certification - and taking care of the factors interacting with the environment - ISO 14001 -.

FUNCTIONAL DESIGN

At Artinox we revolutionize the time spent in the kitchen. All of the Workstations are integrated into the worktop becoming one. The sliding system allows the positioning and the sliding of infinite accessories dedicated to multiple functions; from grids to supports, from chopping boards to containers, these accessories are made to last and to serve with a simple gesture.

OUR STAINLESS STEEL

Our stainless steel AISI 304 and AISI 316 it's used in both domestic and professional environments while meeting all industry standards. It's extremely easy to clean thanks to the non-porous surface, which results in a high antibacterial property. Our steel is unalterable over time, is made up of over 70% recycled materials and is 100% recyclable.

Artinox has chosen AISI 316 L for the OUTDOOR collection, a complete range of products dedicated for the outdoors. This stainless steel is a specialty material, typically used in marine and surgical environments. It offers very high resistance to saltiness as well as food acids.

ACCESSORY CHANNELS

ACCESSORY CHANNELS

Developed to contain a range of interchangeable elements, the accessory channel system is perfect for space optimization and to enhance the functionality of the preparation area. Available in a variety of lengths, this modular system is offered in three different installation options for the kitchen countertop.

INSTALLATIONS

On Top

The accessory channel is designed with a perfect shape, rising 40 mm on the benchtop.

MODULARITY 12, 10, 8, 6, 5 AND 4 UNIT

Top mount

The top mount allows for easy installation on every type of kitchen top.

MODULARITY 12, 10, 8, 6, 5 AND 4 UNIT

Under mount

There are no visible frames from the top, and the equipped elements are aligned with the surface.
